

SOSATEC BALANCERS

People who use SOSATEC Balancers report having

clearer thinking, increased awareness, calmness, better sleep, enhanced mental focus, endurance, stamina, vitality and more. The same benefits are available to horses, dogs and cats with our Animal Balancers.

Our bodies are a complex mass of signals which communicate using subtle yet specific electrical and chemical messages.

For millions of years we lived with natural magnetic fields, with the light and ultraviolet from the sun and relatively small amounts of naturally occurring electromagnetic radiation in nature. It wasn't a problem. Our bodies have natural defences against invaders, be it chemicals, small amounts of electricity or bacteria.

But in the last 20-30 years our environment has been swamped with electricity and chemicals like never before! Our air is filled with electromagnetic radiation from radio stations, TV transmissions, microwaves from mobile phone masts and electric and magnetic fields from all our home & work appliances. As a result our natural body defences are overloaded!

Electromagnetic fields surround and bombard us. These are now hundreds of millions of times above natural background levels which surge creating a quantum amount of chaotic disorganized energy. We have not had time to adapt to these levels of radiation from our use of electricity, mobile and cordless phones and other wireless devices.

As a result we are starting to see the effects that electricity can have on the body.

In Sweden, 'ElectroSensitivity' is officially regarded as a 'Physical Impairment'. 230,000 people (2.5%) in Sweden alone are recognized as being ElectroSensitive in some form. Figures for other countries do not exist, but estimates can be made using the 2.5% figure. A UK government agency recently acknowledged that it is a real condition with sufferers. Other countries are likely to follow suit at some point in the future.

We carry out balance kinesiology tests, to show the physical positive effect of our balancers, by easing of electro- sensitivity.

SOSATEC Balancers are made of high grade electronic silica programmed with natural botanical, mineral and harmonic frequencies at a quantum level, coiled copper amplifiers and embedded in a quality acrylic resin. These natural quantum frequencies assist in re-tuning some of the chaotic disorganized energy that is being circulated round the home/office, thus easing the irritation on the subconscious and reducing stress, improving mental agility, balance, and increasing your overall sense of well-being.

Personal Balancers are intended to be worn continuously during the day and in close proximity at night to fully experience improved balance, performance, strength, endurance, focus, clarity and to help you navigate smoothly through a stressful world.

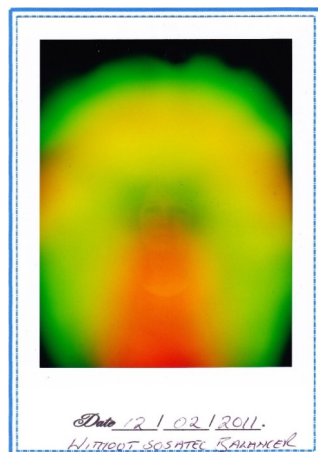

Animal Balancers can be worn on the collar for dogs & cats, plaited into a horse's mane or placed wherever they sleep.

Fuse Box/Car/Router & Hub Balancers are to be placed either on the side of the fuse box, under the vehicle dashboard or on the wireless router or the main hub of a cordless phone system. The balancers help to ease the effect of electro-sensitivity caused by the chaotic disorganized energy in that environment.

Cell Phone Balancers are placed on the back of the cell phone to reduce electro-sensitivity during use.
